Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 20 and 21 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 7/12/06.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claims 6-8, 17 and 18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
4. The Claims set forth above recite the limitation "the blocking member actuator". There is insufficient antecedent basis for this limitation in the claims in that "a blocking member" and "an actuator" have both been previously cited but a "blocking member actuator" has not and it is not clear if applicant is referring to one of the previously cited elements or if this is intended as a different and new element.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-6, 8, 9, 12-16, 18, 19 and 22-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Lenkarski et al. (US Patent # 5,438,784). Lenkarski et al. discloses an autoloading

Art Unit: 3641

pistol with a magazine disconnect mechanism comprising a frame that holds a magazine, a housing carried by the frame and defining a chamber to hold a cartridge, a firing pin disposed in the housing and movable toward the chamber, a blocking member movable into and out of engagement with the firing pin and an actuator that disengages the blocking member from the firing pin when the magazine is inserted in the pistol and engages the blocking member with the firing pin when the magazine is removed from the pistol so that the firing pin is prevented from moving toward and contacting a cartridge in the chamber, the magazine releasably contacts and moves the actuator in a first direction to disengage the blocking member from the firing pin, the magazine breaks contact with and moves the actuator in a second direction to engage the blocking member with the firing pin. The blocking member is vertically movable from a first position in which the blocking member does not engage the firing pin to a second position in which the blocking member engages the firing pin. Further comprising a biasing member to bias the blocking member into the second position. A blocking member actuator is pivotally mounted to the frame and is a lever having one end pivotally mounted to the frame and an opposite free end to operably contact the blocking member. The housing is a reciprocating slide and the blocking member is disposed in the slide. The frame defines an open cavity. The actuator comprises a body and angularly protruding lever arm configured to contact the blocking member. The blocking member actuator maintains contact with the blocking member in the first and second positions. The blocking member is movable in a vertical direction. The actuator is vertically movable between an up position with the magazine inserted in the pistol and a down position with the magazine removed from the pistol.

Allowable Subject Matter

7. Claims 10, 11, and 26 are objected to as being dependent upon a rejected base claim, but would possibly be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. Claims 7 and 17 would possibly be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
